

“

Most parents are told there is no treatment for autism. We beg to differ.

”

Treating Autism 7TH Biomedical Conference & Exhibition, QUEEN MARY, UNIVERSITY OF LONDON, MILE END CAMPUS, 327 MILE END ROAD, LONDON E1 4NS. SAT. 18TH & SUN. 19TH JUNE 2011

Treating Autism are delighted to announce our two day Biomedical Conference & Exhibition which returns to the Queen Mary, University of London this year. Come to hear parents and practitioners sharing their experiences on various treatments that are helping our children. We have an exciting programme of speakers including:

Dr Bruce Russell from the USA, will discuss immune abnormalities associated with autism and their treatments; **Andrew Hall Cutler, PhD** will talk about detoxing children; **Dr Daniel Goyal**, from the Breakspear, will discuss medical interventions available in the UK; **Dr Theoharis Theoharides**, also from the USA will be speaking about his research into mast cell activation in autism, and possible treatments; **Ian Jordan** will share his expertise in vision problems and children with ASD; **Dr William Shaw** will discuss 'Beyond the Basics' of biomed; **Dr Michael Culp** will discuss the benefits of the ONE Test; **Karen Hubert** will talk about diet and getting started; **Maria Griffiths** will discuss the importance of lipids in the diet; and as always parents will be sharing their stories and letting us know how biomed worked for their child. Do note that Saturday morning will offer two streams: an introductory one for beginners and advanced presentations for the other delegates.

The conference is excellent value at £45 per day for Treating Autism members, and £55 per day for non-members. Accommodation is available in halls of residence on campus. Places are limited so book now to avoid any disappointment at www.treatingautism.co.uk or call **07851 423948**

Please join us for a Meet and Greet Friday night and the Treating Ourselves evening social on Saturday night. Finalised details will be posted on our website. We look forward to meeting you all!

Members of Treating Autism enjoy conference discounts, an up-to-the-minute newsletter, discounts at reputable supplement providers and other businesses, complimentary biomedical book and a host of other essential resources.

Join us at www.treatingautism.co.uk, Facebook  or follow us on Twitter 

Confirmed speakers

www.treatingautism.co.uk

Dr Bruce Russell is a Family Doctor who practices in Port Aransas, Texas. His practice includes the care of neuroimmune illnesses, including autism and ME/CFIDS. His presentation will include an overview of immune abnormalities associated with autism and treatment with antiviral and antifungal medications and will discuss promising research related to the Xenotropic murine leukemia virus-related virus (XMRV).

Andrew Hall Cutler, PhD, PE is the author of Amalgam Illness: Diagnosis and Treatment and also of Hair Test Interpretation: Finding Hidden Toxicities. These books are described at www.noamalgam.com and www.noamalgam.com/hairtestbook.html. He has a PhD in chemistry from Princeton, a BS in physics from the University of California. He is a registered patent agent and a licensed professional chemical engineer. He currently works as a detox consultant as well as writing books.

Dr Daniel Goyal joined the Clinical Team at The Breakspear Hospital in Spring 2009. He qualified from Aberdeen Medical School in 2001 and after three years in Occupational and Environmental Medicine, he chose to focus specifically on Environmental Medicine. He is currently running several Environmental Medicine clinics per week and two Autism clinics. Dr Goyal's interests include diagnostic, toxicology and physical medicine.

Dr Theoharis Theoharides is a professor of pharmacology, Internal Medicine and Biochemistry and the director of the Laboratory of Molecular Immunopharmacology and Drug Discovery; Department of Pharmacology and Experimental Therapeutics, Tufts University School of Medicine. He trained in allergy and clinical immunology at Yale and internal medicine at New England Medical Center. Dr. Theoharides was director of medical pharmacology at Tufts (1986-1993), and became full professor in 1995. He has 300 publications and 3 books, including a Textbook of Pharmacology. Dr. Theoharides was the first to show mast cells and acute stress promote inflammation in autism, cancer, intestinal cystitis, migraines and multiple sclerosis.

Ian Jordan For the last twenty years Ian has been involved in cutting edge research and development in the field of visual stimulus modification. He has won a number of awards for research and development and has been described as "the best lecturer in optics". His practice website is www.jordanseyes.com. His topic for our conference is "Timing, mapping and facial recognition - essential interventions in ASD?"

Dr William Shaw is Director of The Great Plains Laboratory for Health, Nutrition, and Metabolism, in the USA. A laboratory specializing in the diagnosis and treatment of metabolic disorders of adults and children with diseases such as autism, PDD, hyperactivity, inborn errors of metabolism, and adult disorders such as depression, fibromyalgia, and chronic fatigue. Dr Shaw recently published the third edition of his book "Biological Treatments for Autism and PDD. What's going on? What can you do about it?", a comprehensive and easy to read guide to the most current research and medical therapies for autism and PDD.

Dr T. Michael Culp, MA, ND. (UK) is the Medical Director of Integrative Health Solutions, Ltd, in London, an innovative multi-disciplinary medical clinic specialising in the treatment of chronic diseases (www.ihs.eu.com). Dr Culp will present to seasoned biomedders, discussing in detail the ONE test, and how it can be used to guide clinical decisions.

Karen Hubert is presently an Autism recovery advocate and is a Physician Liaison for Great Plains Laboratory in the USA. Karen works with families with Autism, ADHD and Fibromyalgia in clinic by providing a support group, dietary and supplement support and cooking classes. Previously Karen suffered from fibromyalgia, Chronic Fatigue and neurological symptoms/sensory problems that mimicked autism. She spent many years in research and recovery which led to her passion for coaching chronic patients and families affected by Autism.

Maria Griffiths graduated as a Nutrition Consultant from the Institute for Optimum Nutrition in 1998 and subsequently founded The Family Nutrition Clinic. Her specialist training enables her to focus on effective biochemical and biomedical treatments, the diet, on gut ecology, heavy metal toxicity and oxidative stress and digestion and many other aspects of the spectrum.
